Index to Volume 83

This index is in three parts: Title, Subject and Author.

Title index

A bleak outlook? (305), 16
A new twist in circular motion, (302), 107
A shining light, (304), 19
A simple test for vitamin C, (305), 131
A tribute to Brian Atwood, (302) 8
A water-band displacement experiment to study stoichiometry, (303), 104
A word too many? (303), 97
Adaptation – a question of definitions? (304), 97
An alternative way to study the role and activity of the catalase enzyme, (303), 100
An impressive sine wave, (302), 105

Biology statistics made simple using Excel, (303), 23
Bond energies: a few issues, (302), 21

Can a novice be viewed as an expert upside-down? (303), 91
Catering for dyslexia – how others benefit, (305), 93
Children with communication difficulties in mainstream science classrooms, (305), 81
Citizen education and science at key stage 3, (305), 125
Citizenship and science; science and citizenship, (302), 33
Controversial issues – science or humanities? (302), 20

Developing a scheme of work for Special School Science: the Cambridgeshire story, (305), 29
Developing effective methods of assessing *Ideas and evidence*, (305), 113
Developing science materials for pupils with special educational needs for the Key Stage 3 Strategy, (305), 19
Developing science concepts through story-telling, (302), 75
Diffusion in a gel, (304), 104

Electric circuits: a new approach – part 1, (303), 55
Electric circuits: a new approach – part 2, (304), 73
Energy-saving bulbs, (304), 20
Energy-saving light bulbs – not such a bright idea? (303), 109
Enhancing museum visits through webpage development, (303), 85

Football pools and the reactivity series of metals, (302), 101

Hydrogen pop condensation bands and the 'Danielle Effect', (305), 132

Inclusion policy and science teaching: a view from the USA, (305), 107
Inside the AS biology classroom, (304), 89
Inspiring science, (304), 18

Light of the first order, (302), 51
Looking at cells: alternatives to onion cells, (304), 103

Modelling a chain-reaction in the classroom, (302), 103
Modelling wave speed in a solid, (303), 107

Percentage error – an analogy, (303), 107
Practical work in school science: the dominance of assessment, (304), 83
Primary science for secondary science teachers: a review of *Primary Science Review*, (302), 85
Putting differentiation into practice in secondary science lessons, (305), 65
Putting life back into biology coursework, (302), 98

Reducing carbon dioxide emissions: using the mole concept, (304), 27
Response to the 'teaching challenge', (303), 17
Risk, environment and health: aspects of policy and practice, (303), 65
School science needs rejuvenating, (304), 19
Science and special needs at Mary Hare School for the Deaf, (305), 101
Science for Public Understanding: a different way to teach and learn science, (304), 35
Science is boring! (303), 17
Science teaching and literacy, part 1: Writing, (303), 35
Science teaching and literacy, part 2: Reading, (304), 51
Science Year (302), 14; (303), 13; (304), 15; (305), 14
Seeking emotional involvement in science education: food chains and webs, (302), 63
Steps and strides: planning for progress in science with pupils in special schools, (305), 41
Structure of the heart: an explicable anomaly, (303), 99

Teachers' views on the future of the secondary science curriculum, (304), 43
Teaching through explanatory stories: 'The dynamic Earth's crust', (304), 63
Testing Murphy's Law: urban myths as a source of school science projects, (302), 23
Thalidomide: corrections, (303), 20
The 'carrot and stick' experiment, (305), 133
The big crunch – models in physics meet the real world, (303), 75
The CASE approach for pupils with learning difficulties, (305), 73
The role of science teachers in the drive for scientific literacy, (304), 21
Self- and peer-assessment and taking responsibility: the science student's role in formative assessment, (302), 43
The search for an infinite force, (304), 109
The use of P-scales in science: a case study, (305), 51

Understanding genetics – a puzzle to capture the imagination, (302), 95
Urban geological trails: a tool for teaching key stage 3 earth sciences, (305), 140
Using a spreadsheet to explore melting, dissolving and phase diagrams, (304), 105
Using MBL to verify Newton's second law and the impulse-momentum relationship with an arbitrary changing force, (305), 135

What makes a chemical equation an equation? (302), 57
Who were they? F. W. Westaway (1864– 1946), (302), 91
Wonder in science teaching and learning: an update, (302), 69

Subject index

adaptation, meanings in teaching (304), 97
AS biology, teachers' perceptions (304), 89
assessment,
  formative, (302) 43
  ideas and evidence, (305), 113
  pupils' views, (304), 83
Attwood, Brian, (302), 8
awe and wonder in science, (302), 69
AVOW diagrams, (303) 55; (304) 73

biology,
  and Excel spreadsheets,(303), 23
  coursework, (302) 98
  use of statistics in, (303), 23
biology teachers, perceptions of AS biology (304), 89
bioluminescence, (302), 51
bond energies, (302) 21

carbon dioxide emissions, (304), 27
'carrot and stick' experiment, (305), 133
CASE, and learning difficulties, (305) 73
catalase, (303), 100
cells, epidermal, (304), 103
chain-reaction, modelling of, (302), 103
chemical equations, (302), 57
chemical kinetics, research in, (302), 51
chromatids, definitions of, (303), 97
circular motion, demonstrations, (302), 107
citizenship, (302), 33; (305), 125
communication difficulties, (305), 81
computer modelling, A-level physics, (303), 75
concept mapping, (303), 91
condensation bands, (305), 132
coursework, GCSE biology, (302), 98

deaf children, (305), 101
differentiation, (305), 65
diffusion, demonstration, (304), 104
dioxetane, (302), 51
dissolving, and spreadsheets (304), 105
dynamo, and sine waves, (302), 105
dyslexia, (305), 93

earth science,
  explanatory stories, (303), 47; (304), 63
  geology trails, (305), 140
electric circuits, new approach, (303), 55; (304), 73
electrostatics, demonstrations, (305), 133
emotions, and involvement, (302), 63
energy-saving light bulbs, (303), 109; (304), 20
environmental issues and carbon dioxide emissions, (304), 27
enzyme activity, (303), 100
epidermal cells, experiments
equations, mathematical and chemical, (302), 57
error, teaching analogy (303), 107
Excel spreadsheets, (303), 23
explanatory stories, earth science, (303) 47; (304), 63

food chains and webs, (302), 63
football pools, and reactivity series, (302), 101
forces, in controlling boats, (304), 109
formative assessment, students' role in, (302), 43

GCSE biology, coursework, (302), 98
generator, demonstration of sine waves (302), 105
genetics, teaching using puzzles, (302), 95
geology trail (305), 140

heart, physiology of, (303), 99

Ideas and evidence, (305), 113
inclusion, policy in USA, (305),107
inheritance, teaching using puzzles, (302), 95
initial teacher training, (303), 85
Internet, and museum visits, (303), 85

key stage 3 citizenship and science, (305), 125
key stage 3 earth sciences, (305), 140
key stage 3 literacy strategy, (303), 35; (304), 51
key stage 3, special educational needs, (305), 29
Kyoto protocol, and CO_2 emissions, (304), 27

language difficulties, (305), 81
light bulbs, energy-saving, (303), 109; (304), 20
literacy in science education, reading, (304), 51
  writing, (303), 35

MBL, (305), 135
melting, and spreadsheets (304), 105
models in physics, (303), 75
mole concept, (304), 27
museum visits, (303), 85

narrow boats, (304), 109
natural selection, (304), 97
Newton's laws; and dataloggers, (305), 135
nuclear division in cells, (303), 97

peer-assessment, (302), 43
percentage error, (303) 107
performance levels, (305), 29, 51
phase diagrams, and spreadsheets, (304), 105
plate tectonics, (303), 47
Primary Science Review, review of, (302), 85
primary science, and story telling, (302), 75
probability, and risk, (303) 65
public understanding of science, (304), 35
pupils' emotions, discussion of, (302), 6
pupils' views on assessment, (304), 83
puzzles, for teaching genetics, (302), 95

reactivity series, (302), 101
research, personal account, (302), 51
resistors and insulators, (305), 133
risk analysis, (303), 65
rock cycle, (304), 63

Science for Public Understanding, (302), 20; (304), 35
scientific literacy, role of science teachers, (304), 21
  teachers' views, (304), 43
self-assessment, (302), 43
sine waves and dynamo, (302), 105
special educational needs in school science,
  assessing progress, (305), 41
  children with language difficulties, (305), 81
  deaf children, (305), 101
  dyslexic pupils, (305), 93
  differentiation, (305), 65
  in USA, (305), 107
  monitoring and assessing progress, (305), 51
  resources for, (305), 19
  schemes of work, (305), 29
  using CASE, (305), 73
spreadsheet,
  and phase diagrams, (304), 105
  Excel, (303), 23
statistics, and biology, (303), 23
Steps and strides, (305), 41
stoichiometry, (302), 57; (303), 104
story telling, learning through, (302), 75

teacher training, concept mapping in (303), 91
teachers' views,
  on science curriculum, (304), 43
  on AS biology, (304), 89

urban myths, (302), 23

vitamin C, test for, (305), 131

water cycle, (302), 75
wave speed, modelling, (303), 107

webpage development, (303), 85
Westaway, Frederick William, (302), 91
wonder, in science education, (302), 69

Author index

Albone, E. (304), 18
Alsop, S. (302), 63
Arrabaça, J. D. (303), 100
Ashelford, S. (304), 97
Auty, G. (302), 105, 107; (304), 109; (305), 133

Baker, J.P. (305), 21
Bancroft, J. (305), 19
Banister, F. (302), 75
Bishop, A. (302), 8
Black, P. (302), 43
Brewer, P. (305), 29

Campbell, P. (305), 125
Cartwright, B. (302), 33
C-H. Cheng, P. (303), 55; (304), 73
Chagas, I. (303), 100
Chapman, L. (305), 51
Cornwell, R. (305), 29
Crick, B. (302), 33

Dillon, J (303), 65

Fensham, P. (302), 57
Fisher, B. (303), 75
Follows, M. (305), 20

Gant, J. (305), 29
Gelbman, M. (305), 135
Gill, P. (303), 65
Goodwin, A. (302), 69; (304), 105

Harris, I. (302), 95
Harrison, C. (302), 43
Heselden, R. (302), 101; (303), 35, (304), 51
Heslop, N. (304) 15
Hill, C. (304), 104; (305), 131
Hoppé, J. (304), 20
Hunt, A. (304), 35

Jarvis, B. (304), 20
Jenkin, P. (304), 21
Jenkins, E.W. (302), 91
Jones, C. (303), 107

Keiler, L. S. (304), 83
Keogh, B. (302), 85
Kinchin, I. (303), 91
King, C. (303), 47; (304), 63
Kumar, D. D. (305), 107

Leach, J. (304), 43
Lever, C. (303), 17
Lewis, R. (303), 17
Lui, J. (302), 57

Marques, L. M. (303), 100
Martin, M. (304), 103
Matthews, R. (302), 23
McKeon, F. (303), 85
Millar, N. (303), 23
Millar, R. (304), 35
Morley, R. (305), 132
Mumford, C. (302), 51
Murphy, E. (305), 140
Murphy, P. J. (305), 140
Myers, A. (304), 27

Nathan, S (302), 103
Naylor, S. (302), 85

Okanu, T. (304) 18
Osborne, J. (305), 113
Oswald, S. (305), 29

Parkash, B. (303), 104
Piggott, A. (305), 65
Porter, C. (304), 19

Ratcliffe, M. (305), 113
Rowcliffe, S. (305), 93
Ryan, C. (302), 75

Shipstone, D. (303), 55; (304), 73
Simon, S. (305), 73
Singleton, L. (305), 41
Solomon, J. (302), 33
St John, S. (303), 109
Staples, R. (303), 35; (304), 51

Talbot, C. (303), 20, 99
Taylor, B. (303), 107
Taylor, N. (302), 103
Trumper, R. (305), 135

Van Praagh, G. (305), 16
Van Rooy, W. (304), 89

Walker, M. F. (303), 97
Wellington, J. (305), 81
Wellington, W. (305), 81
Wilson, J. (302), 98
Woolnough, B. E. (304), 83
Wright, K. (305), 101
